

*Lecturer:* Russell Brown

*Office:* POT 741

*Phone:* 859 257 3951

*E-mail:* russell.brown@uky.edu

*Office hours:* M 2-2:50 in CB065 Mathskeller, WF 2-2:50 in POT 741 and by appointment.

*Lectures:* MWF 1-1:50 in CP 320.

Check your schedule for the location of recitation or workshops.

*Webpages:* Common web page

<http://www.math.uky.edu/~droyster/ma113/>

Information specific to my lecture will be at

<http://www.math.uky.edu/~rbrown/courses/ma113.f12/>

*Grading:* We will follow the suggested grading guidelines in the common syllabus. In particular, the written assignments will be graded and each will contribute 10 points to the final grade. Quizzes will not be graded. I will take attendance in lecture. After allowing for two unexcused absences, your attendance grade will be 40 points multiplied by the percentage of lectures where you are marked present.

*Policies:* Students who miss lecture and would like to request an excused absence should speak with Brown within one week of the absence.

All requests for re-grades of tests and written assignments should be submitted within one week of the date the assignment is returned in class. Please write your question about grading on the paper and return the paper to Brown.

Students who miss an assignment for illness or other reason and wish to be excused from the assignment should speak with Brown to discuss their situation.

Please make use of office hours, the Mathskeller, and The Study. We are here to help.

*Two suggestions:* 1. Form a study group to work on the homework. The best way to learn mathematics is to solve problems with your fellow students. Make sure that you can explain the reasoning behind your solution to a colleague. 2. Review the material before you come to class. Math can be difficult. If you have read through the main ideas, you will be prepared to develop a deeper understanding in lecture and recitation.
