

Calculus I  
MA 113:005-008  
MWF 9-9:50 in CB 114

Fall 2013  
Russell Brown  
russell.brown@uky.edu  
859 257 3951, POT741  
M 10-10:50 in Mathskeller WF 10-  
10:50 and by appointment

*Webpages:* The common web page  
<http://www.math.uky.edu/~ma113/f.13/>

Information specific to my lecture will be at  
<http://www.math.uky.edu/~rbrown/courses/ma113.f.13/>

*Grading:* We will follow the suggested grading guidelines in the common syllabus. Quizzes will not be graded.

*Attendance:* We will take attendance regularly during lecture with sign up sheets. Each student will be allowed two unexcused absences. The attendance points will be awarded in proportion to the number of times you attend.

*Policies:* Students who miss lecture and would like to request an excused absence should speak with Brown within one week of the absence.

All requests for re-grades of tests and written assignments should be submitted within one week of the date the assignment is returned in class. Please write your question about grading on the paper and return the paper to Brown.

Students who miss an assignment for illness or other urgent, unscheduled event and wish to be excused from an assignment or WeBWorK should speak with Brown to discuss their situation. Students who are travelling can complete web homework while travelling and turn in written assignments before they leave.

Please make use of office hours, the Mathskeller, and The Study. We are here to help.

*Two suggestions:* 1. Form a study group to work on the homework. The best way to learn mathematics is to solve problems with your fellow students. Make sure that you can explain the reasoning behind your solution to a colleague. 2. Review the material before you come to class. Math can be difficult and you will not understand every detail after the first reading. If you have seen the main ideas, you will be prepared to develop a deeper understanding in lecture and recitation.
