MA/BIO 337 (001), 3 credits — Spring 2018
MWF 2:00-2:50, Room:347
Mathematical Modeling in the Life Sciences
URL: www.ms.uky.edu/~ofpr222/spring2018/ma337

Instructor: Olivia Prosper
Office Address: 769 Patterson Office Tower (POT)
Office Hours: M 4:00-4:50pm, Th 10:00-10:50am, and by appointment
Email: olivia.prosper@uky.edu
Office Phone: (859) 257-6795

Course Description (Bulletin): MA 337 introduces mathematical modeling in biology and other life science disciplines using discrete and continuous tools and techniques, including difference equations and differential equations. Students will learn to construct, analyze, and simulate models and interpret the results within their biological context.

Prerequisites: A grade of B or better in MA 114 (Calculus II) or MA 138 (Calculus II with Life Science Applications) or department consent.

Course Outline: Biology presents complex problems requiring quantitative approaches to tackle them. The first half of the course will focus on discrete models in mathematical biology, such as difference equations and matrix population models. The second half of the term will focus on continuous models, namely differential equations in mathematical biology. Examples for each type of modeling may be taken from ecology, epidemiology, molecular networks, or gene regulatory networks. By the end of the term, you will have experience posing biological problems and using mathematics to elucidate them. Course topics will be structured as follows:

Discrete Models:
- Single-species discrete population models, their equilibria and stability. Examples include: Simplified Logistic model, Ricker Model, Beverton-Holt model.
- Matrix population models. Examples will be taken from ecology.

Differential Equations:
- One-dimensional continuous population models and their qualitative analysis.
- Introduction to Epidemiological Models: the Kermack-McKendrick SIR and SIS models with no demography.
- Properties of planar systems, their equilibria, phase plane analysis, linear stability analysis, Poincare-Bendixson Trichotomy and Dulac-Bendixson Criterion. Some applications: Lotka-Volterra predator-prey model, SIR model with demography.
- Linear stability analysis for higher order systems. Application: deriving the basic reproduction number $R_0$ in complex epidemiological models.
- Bistability in epidemiological models.

Student Learning Outcomes: After completing this course, students will be able to:
- formulate simple dynamical models to address a biological question;
- simulate these mathematical models;
- perform standard analyses of these models;
- interpret analytical and numerical results within their appropriate biological context;
- read and critique papers in the mathematical biology literature.
Required Materials: The official textbooks for this course (both freely available through your Link Blue account) are

- *Mathematical Concepts and Methods in Modern Biology* (1st edition), edited by R. Robeva and T. Hodge. The book is freely available with a ScienceDirect subscription (which UK has). It is very readable and has many worked out examples. This text will be used for the section on discrete mathematical models.
- *Mathematical Models in Population Biology and Epidemiology* by Fred Brauer and Carlos Castillo-Chavez, 01 January 2012. This Springer textbook is freely available online through UK. This text will be used primarily for the section on continuous mathematical models, although some discrete examples may come from this text as well.

Description of Course Activities and Assignments

Class Participation: Your grade for participation will not only reflect how often you contributed to our class discussions, but the degree to which your contributions were constructive and generative of further response(s) from your fellow classmates.

Exams: There will be two midterm exams during the regular class time and a final project. Each exam is worth 75 points. Exams 1 and 2 are tentatively scheduled for the week of February 12, 2018 and March 19, 2018, respectively. Absolutely no cell phone use is allowed during exams. The final project will be due on the last day of classes and replaces the final examination.

Homework: 10 homework sets will be assigned throughout the semester. Assignments will be collected at least one week after they have been assigned. Students are encouraged to brainstorm solutions to homework problems together, but solutions must be written in their own words and independently.

Final Project: Depending on the size of the class, the final project will be either an individual or small group project. Group sizes will be determined by the instructor. Students will be asked to choose a biological question of interest, subject to the approval of the instructor, and develop a mathematical model (either discrete or continuous) to address this question. The student(s) must write a 10-15-page paper including a section with analytic results, a section with numerical results, and a discussion interpreting the results within their appropriate biological context. Students will also be required to give a 20-minute presentation on their work during the last week of class (either individually or with their small group). Papers will be due on the last day of class, and must be written in \LaTeX. A \LaTeX template will be provided. Specific guidelines for the paper structure will be provided.

Course Grading: Students will obtain a maximum of 500 points in this class, divided as follows:

<table>
<thead>
<tr>
<th>Points</th>
<th>Percent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework</td>
<td>200</td>
</tr>
<tr>
<td>Class participation</td>
<td>50</td>
</tr>
<tr>
<td>Two Midterms</td>
<td>75 each</td>
</tr>
<tr>
<td>Final project</td>
<td>100</td>
</tr>
<tr>
<td>Total</td>
<td>500</td>
</tr>
</tbody>
</table>

A student’s final grade for the course will be based on the total points earned as follows:
<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
<th>Percent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>450-500</td>
<td>90%-100%</td>
</tr>
<tr>
<td>B</td>
<td>400-449.9</td>
<td>80%-89.9%</td>
</tr>
<tr>
<td>C</td>
<td>350-399.9</td>
<td>70%-79.9%</td>
</tr>
<tr>
<td>D</td>
<td>300-349.9</td>
<td>60%-69.9%</td>
</tr>
<tr>
<td>E</td>
<td>0-299.9</td>
<td>0%-59.9%</td>
</tr>
</tbody>
</table>

*Note:* The grading scale might be adjusted at the end of the semester. You will be guaranteed the above letter grade if your score falls within the given range, but the minimum score for each letter grade might be lowered.

**Software:** Students will be permitted to write their code in R or Octave. Tutorials for each will be given in class. Computers will not be permitted on exams, but will be allowed for homework.

**Tentative Course Schedule:**

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 &amp; 2</td>
<td>Single-species discrete population models, their equilibria and stability. Examples include: Simplified Logistic model, Ricker Model, Beverton-Holt model.</td>
</tr>
<tr>
<td>3 &amp; 4</td>
<td>Matrix population models. Examples will be taken from ecology.</td>
</tr>
<tr>
<td>5 &amp; 6</td>
<td>Analysis of multidimensional discrete models First Midterm</td>
</tr>
<tr>
<td>7</td>
<td>Application: Discrete Epidemic Models</td>
</tr>
<tr>
<td>8</td>
<td>One-dimensional continuous population models and their qualitative analysis</td>
</tr>
<tr>
<td>9</td>
<td>Introduction to Epidemiological Models: the Kermack-McKendrick SIR and SIS models with no demography.</td>
</tr>
<tr>
<td>10 &amp; 11</td>
<td>Properties of planar systems, their equilibria, phase plane analysis, linear stability analysis, Poincare-Bendixson Trichotomy and Dulac-Bendixson Criterion. Some applications: Lotka-Volterra predator-prey model, SIR model with demography. Second Midterm</td>
</tr>
<tr>
<td>12</td>
<td>Linear stability analysis for higher order systems. Application: deriving the basic reproduction number $R_0$ in complex epidemiological models.</td>
</tr>
<tr>
<td>13</td>
<td>Bistability in epidemiological models</td>
</tr>
<tr>
<td>14-16</td>
<td>Project presentations</td>
</tr>
</tbody>
</table>

**Mid-term Grade:** Mid-term grades will be posted in myUK by the deadline established in the Academic Calendar: March 5, 2018.

**Tutoring Resources:** If you find that you are having difficulty with any aspect of the course, you should seek help immediately. Please talk to your instructor as soon as possible. Take full advantage of your instructor’s scheduled office hours. If you have conflicts with these office hours, your Instructor will be happy to schedule an alternative time to meet with you.

**Policies**

*Attendance and excused absences:* Attendance in MA337 is mandatory. Be on time and remain until dismissed. Do not leave in the middle of class. Whenever possible, please notify your instructor of absences prior to class. S.R. 5.2.4.2 defines the following as acceptable reasons for excused absences: (a) serious illness, (b) illness or death of family member, (c) University-related trips, (d) major religious holidays, and (e) other circumstances found to fit as reasonable cause for nonattendance by the professor. You may be asked to verify absences in order for them to be considered excused. Senate Rule 5.2.4.2 states that faculty have the right to request appropriate verification when students claim an excused absence because of illness or death in the family. Appropriate notification of absences
due to university-related trips is required prior to the absence. If you anticipate an absence for a major religious holiday please notify your instructor (in writing) of anticipated absences due to your observance of such holidays no later than the last day in the semester to add a class. Two weeks prior to the absence is reasonable, but should not be given any later. Information regarding major religious holidays may be obtained through the Ombud (859) 257-3737, http://www.uky.edu/Ombud/ForStudents_ExcusedAbsences.php

You are expected to withdraw from the class if more than 20% of the classes scheduled for the semester are missed (excused or unexcused) per university policy.

Classroom behavior: Electronic devices such as mobile phones, laptops and tablets should be put away or used only as part of class activities during lectures. Mobile phones, laptops, and computers may not be used during exams.

Make-up policies: Per Senate Rule 5.2.4.2, if you are missing any graded work due to an excused absence you are responsible for informing the Instructor about your excused absence within one week following the period of the excused absence (except where prior notification is required); and for making up the missed work. The instructor will give you an opportunity to make up the work and/or the exams missed due to an excused absence, and shall do so, if feasible, during the semester in which the absence occurred. In particular, if you have university excused absences or have university-scheduled class conflicts with uniform examinations you may arrange with their instructor to take the exam at an alternate time. Generally these make-up exams will be scheduled on the day of or on the day after the regularly scheduled exam. Work-related conflicts are neither university excused absences nor university-scheduled absences.

Students needing accommodations: If you have a documented disability that requires academic accommodations, please see your instructor as soon as possible. In order to receive accommodations in this course, you must provide your instructor with a Letter of Accommodation from the Disability Resource Center (DRC). The DRC coordinates campus disability services available to students with disabilities. It is located on the corner of Rose Street and Huguelet Drive in the Multidisciplinary Science Building, Suite 407. You can reach them via phone at (859) 257-2754 and via email at drc@uky.edu. Their web address is http://www.uky.edu/StudentAffairs/DisabilityResourceCenter/

Accommodations for victims of violence: By federal law, any student who is a victim of dating violence, domestic/intimate partner violence, sexual assault, or stalking (whether on or off campus) is entitled to appropriate accommodations for his or her coursework. To get help getting accommodations and other support, students who are assaulted can do any of the following:

- Tell your instructor who can assist you in accessing resources appropriate to your situation;
- Call the UK VIP Center (Violence Intervention and Prevention Center) at 257-3574 or vipcenter@uky.edu or http://www.uky.edu/StudentAffairs/VIPCenter/about_contact.php or walk in to the Center in Frazee Hall, lower level, between 8:30 and 5:00;
- Call the University Counseling Center at 257-8701; 2nd floor, Frazee Hall;
- Call Ms. Patty Bender from the UK Institutional Equity and Equal Opportunity at 257-8927 or patty.bender@uky.edu;
- In the case of an emergency, contact the UK Police Department at 911.
- Students may also contact community resources 24-hours a day, including: (a) Bluegrass Rape Crisis Center at 800.656.4673 or http://bluegrassrapecrisis.org/
(b) Greenhouse17 (formerly Bluegrass Domestic Violence Program) at 800.544.2022 or http://greenhouse17.org/

**Academic Honesty:** Cheating or plagiarism is a serious offense and will not be tolerated. It will be thoroughly investigated, and might lead to failure in the course or even to expulsion from the university. See http://www.uky.edu/StudentAffairs/Code/part2.html (Sections 6.3.1 and 6.3.2) for information on cheating, plagiarism, and penalties. A summary of recent changes to rules on cheating can be found at the Academic Ombud website: http://www.uky.edu/Ombud

**Non-Discrimination Statement and Title IX Information:** The University of Kentucky faculty are committed to supporting students and upholding the University’s non-discrimination policy.

*Discrimination is prohibited at UK.* If you experience an incident of discrimination we encourage you to report it to Institutional Equity & Equal Opportunity (IEEO) Office, 13 Main Building, (859) 257-8927.

**Acts of Sex- and Gender-Based Discrimination or Interpersonal Violence.**

If you experience an incident of sex- or gender-based discrimination or interpersonal violence, we encourage you to report it. While you may talk to a faculty member or TA/RA/GA, understand that as a “Responsible Employee” of the University these individuals MUST report any acts of violence (including verbal bullying and sexual harassment) to the University’s Title IX Coordinator in the IEEO Office. If you would like to speak with someone who may be able to afford you confidentiality, the Violence Intervention and Prevention (VIP) program (Frazee Hall - Lower Level; http://www.uky.edu/StudentAffairs/VIPCenter/), the Counseling Center (106 Frazee Hall, http://www.uky.edu/StudentAffairs/Counseling/), and the University Health Services (http://ukhealthcare.uky.edu/uhs/student-health/) are confidential resources on campus.
