## MA 138 - Calculus 2 for the Life Sciences

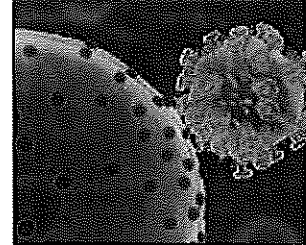

Dear Student,

This website has been designed as a means to support you in MA 138, Calculus 2 for the Life Sciences. In addition to general information on our course policy, this website contains weekly announcements, useful links designed to make your learning experience as easy, rewarding, and as fun as possible.

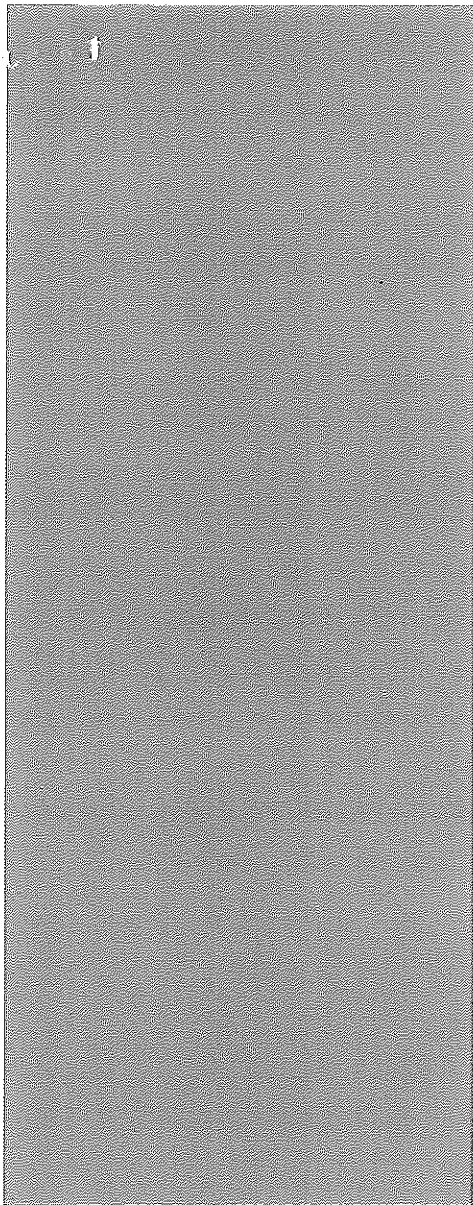

Several files posted on these pages contain embedded mathematics. Currently, they are posted in PDF format and they are printable by the network printers at the various computer labs on campus.

Things are never perfect and neither is this course page! Thus, I welcome your feedback. In particular, what kind of additional material should we post on this page and in what form? Just as

Calculus  
for the Biological and Medical Sciences

Claudia  
NEUHAUSER

important: Do you have a topic or problem that I should address? Let me know!

I hope that you will have a great semester with me. ☺

Alberto Corso
